Feature access keys are user-programmable so you can set up the phone to function most productively for your individual needs and work flow. The advanced technology provides the flexibility you need at a lower cost than the feature-rich Executive or Standard Display Phones.

The Basic Digital Phone improves your productivity and provides exceptional voice and audio quality while taking advantage of the digital communication functionality of the Axxess communications platform. For those in your organization who don't need all the "bells and whistles," you get just the fundamental features you need to enhance your business operations. Use a built-in speaker and microphone to answer intercom calls hands-free and take advantage of on-hook dialing. The "hot" keypad provides user-friendly operation of the phone and greatly reduces the number of keystrokes needed to operate any function. In summary, this is the perfect solution for those who want the advantages of digital communications.
